Delta\textsuperscript{4}® Trolley

Quick, Easy, Ergonomic
**Ergonomic solution**

With the C-shaped Delta4 Trolley, the phantom slides in over the couch for quick and easy positioning of the phantom in the desired measurement position. By placing the phantom over the treatment couch and using the couch’s own height adjustment, the phantom is automatically transferred to the couch top from the trolley. Fine adjustment of the position is done with the adjustable levelling feet against the laser markers on the phantom. Once the trig and communication cable is connected to the accelerator and PC, the system is ready for measurement.

The trolley is also convenient when transporting the Delta4 phantom with storage space to accommodate the calibration phantom and other accessories. The trolley is equipped with big wheels to roll easily on any floor surface.

**Specifications**

**Dimensions (cm)**
