DELTA⁴ FAMILY

PRODUCT RANGE

The Delta⁴ Family is the complete solution for Planning, Pre Treatment and Treatment dose verification covering all modern treatment technologies VMAT, IMRT, SBRT, 4D-RT and TomoTherapy. Each product is specially designed for its application and the software platform is utilized across all Delta⁴ product lines. With independent QA you can be confident that the dose delivered to your patient also is what you had planned.

DELTA⁴ HARDWARE

DELTA⁴ DISCOVER

The Delta⁴ Discover monitors with high accuracy the dose that is delivered to the patient. It automatically compares the delivered dose with the planned dose. The patient and the clinic can be ensured that the treatment is delivered precisely and safely. Express Measure mode can replace Pre Treatment Verification.

DELTA⁴ PHANTOM+

Fast and accurate Pre Treatment Verification. It covers all modern treatment technologies VMAT, IMRT, SBRT, 4D-RT, Tomotherapy and Radixact. It is also a very reliable tool for commissioning linacs.

DELTA⁴ PHANTOM+ MR

Fast and accurate Pre Treatment Verification. Fully compatible with existing MR-linacs.

DELTA⁴ HEXAMOTION

The Delta⁴ HexaMotion 6D motion platform accurately replicates the actual tumor motion. It is used together with the Delta⁴ Phantom+ for verifying plans using Tumor tracking or Gating.

DELTA⁴ TROLLEY

The trolley is specially designed for quick, easy and ergonomic set up of the Delta⁴ Family of products on the treatment couch.

DELTA⁴ SOFTWARE

DELTA⁴ INSIGHT

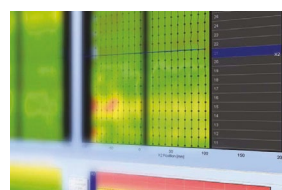

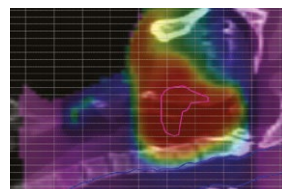

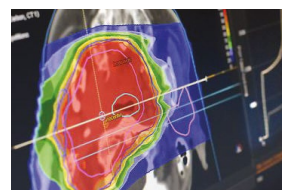

Delta⁴ Insight is an independent secondary 3D dose calculation software that utilizes a state-of-the-art Monte Carlo engine.

DELTA⁴ ANATOMY

Analyzes the dose delivered in the patient Anatomy. The Delta⁴DVH Anatomy calculates, based on measurements from the Delta⁴ Phantom+ and/or the Delta⁴ Discover, the doses delivered in the patient geometry taking into account its heterogeneities.

DELTA⁴ MACHINE QA

A verification with respect to start-up behavior, machine consistency and MLC accuracy.

Innovative and Efficient QA

The ScandiDos mission

The Delta⁴ family of products are developed, engineered and manufactured by ScandiDos, a company that strives to improve the treatment of patients with cancer worldwide. ScandiDos achieves this by reinforcing the confidence in radiotherapy clinics using innovative solutions that further individualize the radiation treatment, making the process safe and efficient. The Delta⁴ Family of products delivers a comprehensive solution for radiation therapy and quality assurance, ensuring safe and accurate treatment. Today, we support our customers worldwide with offices and partners in Europe, USA and Asia, continuing our mission of **empowering professionals with power and performance.**

ScandiDos AB, a worldwide leader in quality assurance solutions and dosimetry for radiation therapy.
