

Have You Unlocked the Full Potential of the Delta4?

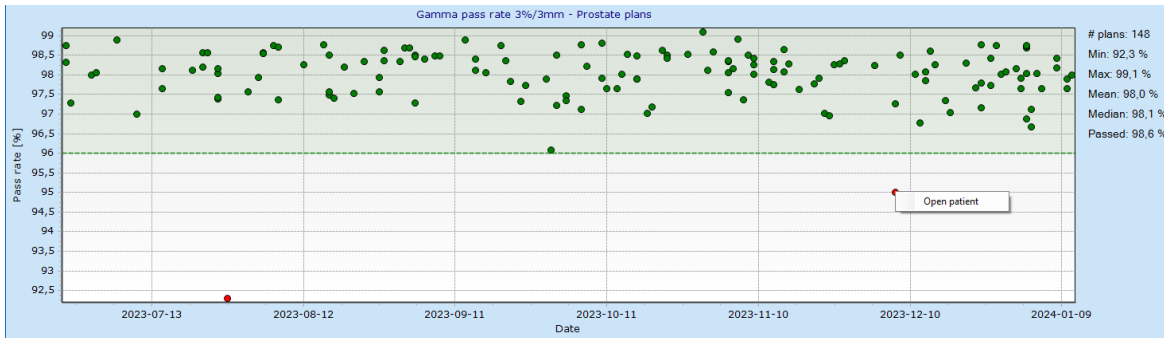

Maximize the performance of your Delta4 system with the latest software features, available exclusively through an active service contract.

Renew your Service Contract and gain access to:

- Automatic Temperature Correction***
 Achieve precise measurements with real-time temperature compensation for each detector, minimizing inaccuracies.
- Automatic DICOM Import**
 Simplify your workflow by automatically importing treatment plans.
- Automatic Field Sequencing (Automatic Measurements)**
 Automatic start and stop of measurements between fields and arcs.
- Display Statistics Over All Performed Measurements**
 Track trends and evaluate performance to continuously improve your QA practices.

Compensate for temperature variations in the detectors

- Gamma Evaluation Table**
 View and evaluate results with comprehensive gamma analysis at your fingertips.
- Daily Position Corrections**
 Automatically apply position offsets to all measurements performed in a session.
- Merge Multiple Measurements**
 Merge unlimited measurements to achieve unrestricted longitudinal field size and resolution

Gamma Evaluation Table

*The Automatic temperature corrections function requires an up to date software and hardware service contract or a purchased upgrade. Not available for all systems. Please contact your Scandidos representative for further information.

Key Features Across Our Delta4 Software Releases

Our commitment to continuous improvement ensures that each software release delivers enhanced performance and innovative features.

MAR 2019

Correction factors for measurements along detector boards

- Eliminate the need to rotate the phantom when measuring beams from 0, 90, 180 and 270 degrees.

DEC 2020

Automatic DICOM import

- DICOM files from the TPS are automatically imported into the Delta4 software.

MAR 2023

Merge multiple measurements

- No limitation in longitudinal field size and resolution for measurements.
- Machine QA support for Halcyon.

OCT 2024

Update Delta4 statistics module

- Database mining.
- Comparison diagrams.
- Copy plans for comparisons.

NOV 2019

Automatic measurements and depth correction

- The user no longer has to manually start and stop the measurements between fields/arcs.
- Depth correction factor in the absolute calibration improves accuracy in measurement results.

NOV 2021

Daily position corrections

- Eliminate need to manually enter position offset for each plan.
- Save plan as new patient. Avoid calibration/test patients becoming too large.
- Automatically separating out kV dose on Synchrony. Avoid the imaging dose distorting the measurements.

MAY 2024

Introducing Delta4 statistics module

- View trends, track changes and find outliers in the measurement data.

Introducing Automatic temperature correction

- Automatically measure the temperature in each individual diode at the start of each measurement.

Don't miss out on these powerful features. Contact us today to renew your service contract.

Comprehensive support and regular upgrades

At ScandiDos, we are committed to providing our customers with the highest level of service and support, and our service contracts reflect that commitment.

With our service contracts you can rest assured that our team will assist you every step of the way. Whether you're dealing with routine maintenance or unexpected problems, we will work with you to find the best solution and get your equipment back up and running as quickly as possible, at no extra cost.

- Support** 
Covering all time zones
- Save money** 
No unexpected charges
- Troubleshooting** 
Phone, online and email
- Priority** 
Prioritized response
- Minimize downtime** 
Experts and spare parts always available
- Technical support** 
Phone, online and email
- Upgrades** 
Software and firmware versions
- Languages** 
Full support in 6 languages
- Training** 
Update your Delta4 skills
